Profile Summary

Aspiring Product Manager with 1+ year of hands-on experience in Frontend development, SaaS product execution, and digital forensics solutions. Experienced in building and contributing to cybersecurity, financial investigation, and enterprise web applications while collaborating with cross-functional teams across product, design, and engineering. Strong foundation in requirements gathering, user workflow analysis, feature planning, stakeholder communication, and Agile development practices. Skilled in translating business needs into scalable product solutions, with technical expertise in React.js, JavaScript, API integrations, MySQL, Python, and frontend architecture. Passionate about combining technology, user needs, and business objectives to deliver impactful products and drive measurable outcomes.

Professional Experience

Software Developer Intern – Product & Frontend Development | Pelorus Technologies | Jan 2025 – Present

- **Contributed to SaaS-based** cybersecurity, digital forensics, and financial investigation products through frontend development and product workflow understanding.
- **Worked on product** modules including dashboards, authentication flows, admin panels, investigation workflows, reporting screens, and user-facing interfaces.
- **Built responsive** and scalable UI components using React.js, JavaScript, Material UI, Bootstrap, Tailwind CSS, and API integrations.
- **Collaborated with backend developers** to integrate REST APIs, handle data flows, debug issues, and improve end-to-end feature functionality.
- **Supported product execution** by understanding user requirements, converting workflows into screens, and improving usability across modules.
- **Worked on Breach & Attack Simulation** platform modules such as Abilities, Payloads, Adversaries, Agents, Operations, Execution Logs, and Environment management.
- Gained hands-on exposure to financial investigation products such as **FundTrail Analyzer**, including transaction analysis workflows, reporting, and fund movement visualization concepts.
- **Participated in Agile-style development** activities including feature discussions, testing, bug fixing, release improvements, and cross-team coordination.
- Prepared UI flows, feature documentation, and implementation notes to support smoother product delivery.
- **Developed strong understanding** of SaaS products, cybersecurity workflows, digital forensics use cases, and product management fundamentals.

Education

- BCA – Computer Science | Tilak Maharashtra Vidyapeeth, Pune | 2023–2026 | GPA: 8.5

Certifications

- Career Essentials in GitHub Professional Certificate — **GitHub**, Apr 2026
- Career Essentials in Generative AI — **Microsoft & LinkedIn**, Apr 2026
- Docker Foundations Professional Certificate — **Docker, Inc.**, Apr 2026
- JavaScript Essentials 1 — **Cisco Networking Academy**, Apr 2026
- Deloitte Australia Technology Job Simulation — **Forage**, Apr 2026

Skill & Tools

- **Product & Business Analysis:** Requirements Gathering, User Story Writing, BRD/FRD Documentation, User Workflow Mapping, Feature Planning, Product Research, Use Case Analysis, Stakeholder Communication.
- **Product Management:** Product Roadmapping, Sprint Planning, Agile/Scrum, Release Planning, Feature Rollouts, KPI Understanding, Go-to-Market Support, Product Documentation
- **Technical Skills:** React.js, JavaScript, HTML, CSS, REST API Integration, MySQL, Python Basics, FastAPI Basics, Data Flow Understanding
- **Tools:** Jira, Trello, Notion, GitHub, VS Code, Postman, Power BI Basics, Figma Basics
